

Multitool oscillating saw blades (Black I.C.E. Coating)

Article NO. Evertec M019 I.C.E. 30.5mm (1-1/5"), Milled teeth

Black I.C.E. Coating Bi-Metal Standard Flush-Cut Metal Sawblade

- Broad range of applications with HSS hardened teeth.
- Milled teeth for fine, straight cutting into hard and soft wood, aluminum, plastic and no-ferrous metal.

- **4.5-5 X longer life vs. standard saw blade.**

Black I.C.E. Coating protects cutting edge against wear for extreme durability and longer blade life.

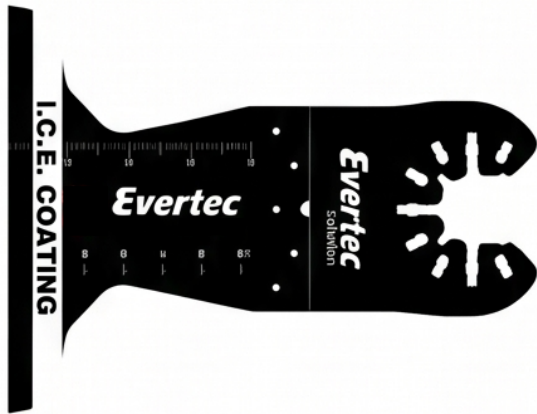

Article NO. Evertec M020 I.C.E. 44mm (1-3/4"), extended saw blade, Milled teeth

Black I.C.E. Coating Bi-Metal Standard Flush-Cut Metal Sawblade

- Broad range of applications with HSS hardened teeth.
- Milled teeth for fine, straight cutting into hard and soft wood, aluminum, plastic and no-ferrous metal.

- **4.5-5 X longer life vs. standard saw blade.**

Black I.C.E. Coating protects cutting edge against wear for extreme durability and longer blade life.

Article NO. Evertec M021 I.C.E. 65mm (2-9/16"), Milled teeth

Black I.C.E. Coating Bi-Metal Standard Flush-Cut Metal Sawblade

- Broad range of applications with HSS hardened teeth.
- Milled teeth for fine, straight cutting into hard and soft wood, aluminum, plastic and no-ferrous metal.

- **4.5-5 X longer life vs. standard saw blade.**

Black I.C.E. Coating protects cutting edge against wear for extreme durability and longer blade life.

Multitool oscillating saw blades (Carbide teeth)

Article NO. Evertec M022 34mm (1-5/16"), Carbide teeth

Carbide teeth Sawblade for toughest metal cutting

- Broad range of applications with HSS hardened teeth.
- Milled teeth for fine, straight cutting into hard and soft wood, aluminum, plastic and no-ferrous metal.

- **50 x longer life than standard Multi-tool blades**

Article NO. Evertec M023 34mm (1-5/16"), Carbide teeth

Carbide teeth Sawblade for toughest metal cutting

- Broad range of applications with HSS hardened teeth.
- Milled teeth for fine, straight cutting into hard and soft wood, aluminum, plastic and no-ferrous metal.

- **50 x longer life than standard Multi-tool blades**

Article NO. Evertec M024 34mm (1-5/16"), extended saw blade, Carbide teeth

Carbide teeth Sawblade for toughest metal cutting

- Broad range of applications with HSS hardened teeth.
- Milled teeth for fine, straight cutting into hard and soft wood, aluminum, plastic and no-ferrous metal.

- **50 x longer life than standard Multi-tool blades**
